Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, as far as they are drawn to a method for modulating the level of a polypeptide of SEQ ID NO: 1 or 3 in a cell, classified in class 514, subclass 2, for example.
 - II. Claims 1-12, as far as they are drawn to a method for modulating the activity of a polypeptide of SEQ ID NO: 1 or 3 in a cell, classified in class 514, subclass 2, for example.
 - IV. Claims 13-22, drawn to a method for modulating the level of a nucleic acid of SEQ ID NO: 2 or 4 in a cell, classified in class 514, subclass 44, for example.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related in that they are both drawn to a method of modulating a polypeptide in a cell, however, invention I is drawn to modulating the level while invention II is drawn to modulating the activity of a polypeptide, and these would have different mechanisms of action and would be accomplished using different compounds, and are thus patently distinct methods.

Inventions I and II are unrelated to invention III. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the method of modulating the level of a nucleic acid in cell would be accomplished

Art Unit: 1646

by a different compound than that of inventions I and II, and would have a different result, and are thus patently distinct methods.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their different classification or recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
